To: COA <COA@edisongrain.com>
Subject: PR CCF25-1951-US-22-3191

Positive Release:

I have compared Tentamus Lab Results for Organic Corn Flakes, Lot: CCF25-1951-US-22-3191 with the Supplier Specs and Edison Grain thresholds.

- All microbiological tests are within acceptable parameters.
- Gluten levels are <10 ppms

Product has now been given a positive release and may continue with production.

Watermarked COA can now be posted online. Due to complications with original lab results we may have posted the California Cereal COA. Please replace with the lab analysis. Also, the same COA should be posted under Flours/Corn Flake Crumbs using lot: CCF25-1951-US-22-3191

Thanks

Amy Barnes, PCQI
